## 2012-2013 Sustainability Report: Letter From the Chairman and CEO: The Coca-Cola Company

### Letter from the Chairman and CEO

October 31 9:00am

intro  
me  
we  
world  
reporting  
index

Dear friends,

Sustainability is at the heart of the Coca-Cola story. Together with our bottling partners, we've long worked to build stronger, healthier, more active communities and advance environmental conservation. Why? Because we know our business can only be as healthy, vibrant and resilient as the communities we proudly serve.

For decades, our Company – like many others – has worked to be part of society's solutions. Coca-Cola, for example, was promoting physical activity in the 1930s, varied size and packaging choices in the 1950s and anti-litter campaigns in the 1960s. And our first diet cola, TaB, debuted 50 years ago.

Today, we're advancing 21<sup>st</sup> century solutions by partnering across the golden triangle of business, government and civil society. We feel a special accountability as a business that operates on a global scale to help improve the well-being of our communities while doing what we can to responsibly steward the natural resources of the planet we all share.

For us, this is a journey. We're making progress as we create social value and strive to operate in ever more sustainable ways. After all, as we like to think about it, we're not building The Coca-Cola Company so much for the next quarter, but the next century.

Taking the long view has served us well. We are calling attention to and affecting positive change on global issues that have a significant

impact on building a more sustainable and resilient value chain – not only for our Company, but also the communities we proudly serve.

**We at The Coca-Cola Company firmly believe** there are no issues that will more shape or define the 21<sup>st</sup> century than the global empowerment of women; the management of the world's precious water resources; and the well-being of the world's growing population. Let me share with you our progress on each of these priorities:

**Women:** We continue advancing our 5by20 initiatives to enable the economic empowerment of 5 million women entrepreneurs across our global value chain by 2020. From fruit farmers and artisans to micro-distribution center owners, we are helping women entrepreneurs overcome the barriers they face to business success by providing them with professional training, support networks and access to finance. In just three years, our 5by20 programs enabled 300,000 women in more than 12 countries more than double the number of participants in 2011.

**Water:** At Coca-Cola, we understand that water is absolutely vital to our business. As such, we've set a goal to replenish 100 percent of the water used to make our beverages by 2020. To date, about 52 percent of our global product volume is estimated to be replenished through 468 community water projects around the world.

These projects take many forms, from

rainwater harvesting and drip irrigation to safe water access and sanitation. Our safe water efforts also include our partnership with DEKA R&D to place between 1,500 and 2,000 EKOCENTERS (a kiosk designed to improve the well-being of communities) or Slingshot water purification systems in 20 countries by the end of 2015. In addition, we're working to improve our water efficiency, which we define as the amount of water we use per liter of product, by 25 percent through operational advancements across our system. This goal builds on the 21.4 percent improvement we've already made between 2004 and 2012.

**Well-being:** Our business continues to be built on a heritage of uncompromising quality – the promise that all our beverages are safe, refreshing and delicious. Today across 200-plus countries and territories, we offer the choice of more than 500 brands and 3,500 beverages, with the health and well-being of our consumers playing a large and growing role in the development of our brands.

While some of our beverages are designed for local tastes, our well-being commitments are universal. As we announced on May 8, 2013, our teams are working to provide low- and no-calorie beverage options in every market; provide transparent nutrition information featuring calories on the front of all our packages; market all our beverages responsibly; and help get people moving by supporting active, healthy living programs in every country where we do business.

As we work to double the overall size of our business over the course of this decade, we are further embedding sustainability with our 2020 Vision for growth. In this report – our

most comprehensive to date, demonstrating our commitment to increased transparency – we present our leadership priorities of women, water and well-being, which are rooted in an expanded set of sustainability goals announced earlier this year. These priorities are integral to our sustainability framework, which we call "Me, We, World" – our shared vision for how we can work together to create more value for our consumers and communities.

We are collaborating across the golden triangle with a variety of extraordinary organizations to advance our progress. The cumulative expertise of our partners both inspires and enables us to do far more than we could alone. As we strive to improve each and every community we proudly serve, we continue to support the United Nations Global Compact.

Thank you for your interest in the efforts of The Coca-Cola Company and our valued bottling partners. We appreciate you taking the time to review this report, and invite you to share your thoughts with us. Together, I'm convinced that we will continue to refresh the world, inspire moments of optimism and happiness, create value and make a positive difference.

Very best regards,

Muhtar Kent  
Chairman of the Board and  
Chief Executive Officer  
The Coca-Cola Company
